

RE 1513MO Galvanised Steel Trailer

Mechanical Override Brakes

Redco trailers have been manufactured for over 50 years and have stood the test of time. The Redco Sportsman RE1513MO 4.9m boat trailer is built tough to perform and last using the latest quality components and 350/450 Aussie made steel.

The Redco Sportsman RE 1513 MO with Mechanical Override brakes and 13" wheels suits 4.9m boats and has combined trailer and boat weight of 1000kg.

Some brands require the trailer to be fully submerged for loading and unloading – not so with the Redco range of trailers keeping the trailer as dry as possible which will not only help in the maintenance and cleaning but makes loading & unloading effortless.

Roller Configuration Option
