Rec Power	2 x 150HP
Max Power	2 x 200HP

Winner of the Queensland Transport Designer of the Year Award in 1991, no other vessel in her class can match the proven performance and reliability of the 7.2m KEVLACAT. The fuel economy that the 170HP Yanmar diesel shaft drives achieve is truly unbelievable with two engines consuming 11.5 litres an hour. Many people ask us twice, " ...are you sure you have done your figures correctly?" If you are a commercial operator or serious sportsfisherman, this is music to your ears.

The 7.2 has proved itself time and time again in Game Fishing Tournaments around Australia. Its ability to get back on a fish in quick time has to be seen to be believed. Indeed, no other vessel in her class comes close in terms of sea worthiness, stability and maneuverability.

With a wide beam of 2.8 metres, the 7.2 metre KEVLACAT gives unsurpassed stability and deck space to please the most demanding fisherman, and yet the huge cabin can be customised to give incredible space and family comforts. Whether you're after a serious gamefisher, commercial vessel or just a safe family boat, look no further. The 7.2 metre is now available with diesel shaft drive engines, a first for a vessel in this class. Of course it is also available with outboards or sterndrives.

📍 26 Prospect St, Mackay, QLD, 4740
